

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.

GONORRHEA.**State Reports for April, 1915.**

During the month of April, 1915, gonorrhea was notified in States as follows: Vermont, 13 cases; Wisconsin, 29 cases.

LEPROSY.**Hawaii Report for March, 1915.**

The Territorial Board of Health of Hawaii reported that during the month of March, 1915, cases of leprosy were notified in the islands of Hawaii as follows: Hawaii, 5; Maui, 1; Molokai, 1; Oahu, 3.

Texas—San Antonio.

Surg. von Ezdorf reported May 13 that while at San Antonio, Tex., May 7, 1915, he had seen a well-developed case of leprosy in a male 27 years of age. This man had resided in San Antonio for the preceding 10 years and had first noticed the lesions of leprosy three years ago.

MALARIA.**State Reports for April, 1915.**

During the month of April, 1915, malaria was notified in States as follows: Maryland, exclusive of Baltimore City, 4 cases; Massachusetts, 3 cases.

MEASLES.**California—Panama Pacific Exposition.**

Senior Surg. Pierce reported that on April 9, 1915, 2 cases of measles in children were found at the living quarters adjacent to the Chinese Pagoda, Panama Pacific International Exposition, San Francisco, Cal. The patients were removed to the quarantine hospital and other means taken to prevent the spread of the disease.

See also Diphtheria, measles, scarlet fever, and tuberculosis, p. 1558.

PELLAGRA.**State Reports for April, 1915.**

During the month of April, 1915, cases of pellagra were notified in States as follows: Maryland, exclusive of Baltimore City, 3; Massachusetts, 2.

City Reports for Week Ended May 1, 1915.

During the week ended May 1, 1915, cases of pellagra were notified in cities as follows: Auburn, N. Y., 2; Hartford, Conn., 1; Nashville, Tenn., 2.

PLAGUE.**Louisiana—New Orleans—Plague-Infected Rats Found.**

Surg. Creel reported by telegraph May 14, 1915, that positive verification of plague infection was made on the date of the report in four rats captured at Royal and St. Roch streets May 4, 1915, and in telegram dated May 17, 1915, the same officer reported that one plague-infected rat had been found at the parish prison, corner of Gravier and Saratoga Streets, New Orleans, La.
